SWISS GERMAN UNIVERSITY

The purpose of this research is to analyze Indonesia's legal framework for online gambling, comparing it with regulations in Southeast Asia and benchmarking it against international best practices to identify gaps and recommend improvements. The study also integrates IT governance perspectives using COBIT 5's MEA03 process to enhance regulatory enforcement. A qualitative methodology is applied, involving literature review, comparative legal analysis, and IT governance mapping. Data is gathered from legal documents, regulatory frameworks, and secondary sources, with findings validated through a hermeneutics approach and expert interviews. The findings reveal significant regulatory gaps in Indonesia's framework, including challenges in enforcement, jurisdictional limitations, and the impact of technological advancements such as cryptocurrency. Comparative analysis highlights Singapore's licensing system and the Philippines' structured enforcement as effective models. Mapping with COBIT 5 identifies opportunities for improved monitoring and compliance through IT governance. It is concluded that Indonesia's efforts to combat online gambling require updated legislation, international collaboration, and enhanced technological tools. Recommendations are provided to policymakers for strengthening enforcement and aligning regulations with global standards, aiming to create a safer digital environment while addressing socio-economic concerns.

Keywords: Online Gambling, Regulation, Indonesia, Southeast Asia, COBIT 5, IT governance.

DEDICATION

My family, whose unwavering support, encouragement, and belief in me have been my greatest source of strength and inspiration throughout this journey.

My friends, who have shared in my challenges and triumphs, providing constant encouragement and understanding.

My colleagues and workplace, for fostering an environment that values growth and learning, enabling me to achieve this milestone while balancing professional commitments.

ACKNOWLEDGEMENT

I would like to express my deepest gratitude to Dr. Ir. M. A. Amin Soetomo M.Scand Mr. Dr. Ir. Heru Purnomo Ipung, M.Engas my Thesis advisor for the time, support, advice, and guidance given throughout this research project and the completion of this thesis report. It is because of their priceless contributions that this thesis report and the whole research project can arrive at this point.

I would like to thank my family the countless moral supports throughout my pursue of knowledge in SGU. I can't thank you enough for the time that already taken from you for me to make this thesis done.

I would like to thank all of my direct supervisor, my team at work and my friends especially Batch 31 MIT SGU for their companionship, and to the countless number of people who have helped me throughout this research project, either directly or indirectly.
