SWISS GERMAN UNIVERSITY

The Indonesian tourism industry, a significant economic contributor, is undergoing a digital transformation, particularly within the hospitality industry sector. Increased reliance on technology has improved guest experiences and operational efficiency and introduced substantial cyber risks. This research aims to identify and assess these risks, develop cyber risk profiles for the Indonesian hospitality industry, and develop security guideline for hospitality industry. By addressing these challenges, this research will improve the cyber resilience of the Indonesian hospitality sector and contribute to the overall security of the nation's digital ecosystem.

Keywords: Cyber Risk, Hospitality Industry, Cybersecurity, Cyber Threats, Digital Ecosystem.
